-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 9-17, and 19-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Szabo et al. (3,993,065). Szabo discloses an adaptor (24) connectable with an automatic syringe pump (14) for a hand-held syringe and a hand-held syringe (16), the syringe containing contents to be dispensed, the adaptor comprising a syringe driver (28) for agitating the contents of the syringe, wherein the adaptor comprises an adaptor body receivable by a syringe receiving unit of the syringe pump, and a syringe retainer (20) comprising an annular syringe ring for retaining a flange of the hand-held syringe, wherein the driver can cause the syringe ring to rotate, further comprising a guide piston (not numbered), an extension arm (distal part of 28), and a dispense rod (17) rotatably mounted to the extension arm. It is the position of the Examiner that the inherent use of the device meets all of the steps disclosed by the Applicant.

Allowable Subject Matter

Claims 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed 9/14/2006 have been fully considered but they are not persuasive. In response to the Applicant's argument that Szabo fails to disclose a syringe driver for agitating the contents of the syringe, the Examiner respectfully disagrees. The Examiner is relying on the definition of "agitate", according to Merriam-Webster's Online Dictionary, which is "to give motion". It is the Examiner's position that the driver (28) "gives motion" to the contents of the syringe.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
